

Natator 40 & 40 mobile

Water pressurisation machine

Datasheet, 14.05.2025, V2.1

 Engineered and made in Switzerland

The Natator 40 and 40 mobile are devices designed for leak testing watches and other components by immersing them in pressurized water.

Pressurization up to 40 bar (~400 meters under water) is possible.

They operate without an external power supply and are entirely manual.

Machine functions

- Pressure up to 40 bar (~400 meters depth)
- Stainless steel tank and drip tray
- No connection required
- Total autonomy for pressure management thanks to ratchet-type handwheel
- Built-in pressure gauge
- Natator 40 mobile with tappets function
- Ideal for unitary control and after-sales service

Technical specifications

	Natator 40	Natator 40 mobile
Working pressure :	0 to 40 bar	0 to 40 bar
Ø Inside tank :	67 mm	67 mm
Height inside tank :	65 mm	65 mm
Tank capacity :	0,23 L	0,23 L
Capacity :	1 watch	1 watch
Weight :	8,2 kg	8,2 kg
Dimensions closed device (l/d/h) :	210 x 280 x 265 mm	210 x 280 x 265 mm
Dimensions open device (l/d/h) :	255 x 280 x 310 mm	255 x 280 x 310 mm
