

Natator 125 & 125 mobile

Water pressurisation machine

Datasheet, 02.06.2023, V2.0

 Engineered and made in Switzerland

The Natator 125 and 125 mobile are devices designed for leak testing watches and other components by immersing them in pressurized water.

Pressurization up to 125 bar (~1'250 meters under water) is possible.

They operate without an external power supply and are entirely manual.

Machine functions

- Pressure up to 125 bar (~1'250 meters depth)
- Stainless steel tank and drip tray
- No connection required
- Total autonomy for pressure management thanks to ratchet-type handwheel
- Built-in pressure gauge
- Natator 125 mobile with tappets function
- Ideal for unitary control and after-sales service

Technical specifications

	Natator 125	Natator 125 mobile
Working pressure :	0 to 125 bar	0 to 125 bar
Ø Inside tank :	80 mm	80 mm
Height inside tank :	65 mm	65 mm
Tank capacity :	0,33 L	0,33 L
Capacity :	1 à 3 watches	1 watch
Weight :	11,9 kg	11,9 kg
Dimensions closed device (l/d/h) :	250 x 325 x 300 mm	250 x 325 x 300 mm
Dimensions open device (l/d/h) :	310 x 325 x 355 mm	310 x 325 x 355 mm
