

Revelator R1 & R10

Machine for revealing condensation

Datasheet, 01.06.2023, V2.0

 Engineered and made in Switzerland

The Revelator R1 and R10 are devices allows of advantageously replace the « water drop » test with a cold touch system with adjustable temperature.

Machine functions

- For revealing condensation on crystals
- The cold point setting can also reveal condensation on thick crystals
- Stability of hot and cold temperatures, ensuring test repeatability
- Touch-screen
- Heating plate in standard on Revelator R1
- Heating plate in option for Revelator R10

Software functions

- Intuitive menus
- Programmable temperature and time parameters
- Memorizing up to 20 different test programs

Revelator R1

Revelator R10

Technical specifications

Revelator R1

Supply voltage :	110-230 V / 50-60 Hz
Power :	55 W
Capacity :	1 watch
Heating temperature * :	40 to 50 °C
Weight :	4,5 kg
Dimensions (l/d/h) :	230 x 310 x 125 mm

Revelator R10

Supply voltage :	110-230 V / 50-60 Hz
Power :	300 W * (600W)
Capacity :	10 watches
Heating temperature * :	* 40 to 55 °C
Weight :	18 kg * (23,7 kg)
Dimensions (l/d/h) :	505 x 555 x 145 * (220) mm

* With heating plate option on Revelator R10

Available options

Heating plate in option for Revelator R10

Possibility of heating 10 watches
before the test with the cold points

Power :	300 W
Weight :	5,7 kg
Dimensions (l/d/h) :	500 x 180 x 75 mm
